NON-MAGNETIC AND NON-RADIO FRE-QUENCY INTERFERENCE SYSTEM FOR IL-LUMINATION OF BACKLIT STATIC IM-AGERY AND METHOD FOR PROVIDING PACIFICATION TO MAGNETIC RESO-NANCE IMAGING PATIENTS

Abstract

A system and method for illuminating a back lit translucent decorative panel(s) disposed in a hung ceiling frame, which includes an array of DC powered LEDs in an assembly which is non-ferrous and non-magnetic so as to facilitate use near MRI equipment.
